DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by U.S. Patent 5,644,670 to Fukuda et al. Fukuda et al. teaches a coated optical fiber and a method of making the same. The optical fiber has a polymer covering layer coating **3** and a primary coating **4**, both made of polymer. (See at least **Fig. 1** and description from **column 6 line 8 to column 7 line 29**) Fukuda further teaches that the glass transition temperature of the polymer cover layer and the primary coating can be above 60°C and below -20°C, for a difference of at least 80°C.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent 6,815,004 to Vanpouille et al., particularly column 1, lines 35-55.
